

#### Subminiature-C™ Interface

Accu-Glass Products Subminiature-C™ multipin hermetic feedthroughs are designed for applications where space is limited or where Subminiature-D connections will not fit. This compact and unique 9-pin design allows installation into 1.33 inch CF metal seal and ISO NW16 KF elastomer seal flanges. Nine gold-plated pins are arranged in a straight through pin-to-pin design and are hermetically sealed and electrically insulated in a stainless steel shell using the latest in glass-ceramic bonding technology.

Subminiature-C<sup>™</sup> feedthroughs and cables are sold individually or as kits, where each kit contains a feedthrough and both vacuum and air side cable assemblies.

Air and vacuum side connectors are fitted with captured stainless steel socket head screws that provide a means of securely locking them to their mating feedthroughs. On the vacuum side, Kapton® insulated cable assemblies fitted with PEEK connectors are available to meet the rigorous demands of ultrahigh vacuum environments. In-vacuum connector screws are vented where required and the feedthrough's screw-boss functions as a connection polarizing key. Air to vacuum pin position is identified with a permanent surface mark, which clearly locates pin assignments.

#### **Features**

- Subminiature-C<sup>™</sup> 9-Pin Interface
- High temperature rated to 250°C
- UHV compatible construction
- Conflat® and ISO NW compatible mounts
- Kapton<sup>®</sup> Insulated Vacuum Cables
- PEEK or Macor® Connectors with Locking Screws
- Air Service Cables / Connectors
- Custom Solutions on Request

#### **Specifications**

#### **Electrical**

Voltage 1, Maximum	500 VDC
Current <sup>2</sup> , Per Pin Maximum @ 20°C	5 A

#### Material

Shell	304 Stainless Steel
Pins	Au plated, Ni-Fe alloy
Seal / Insulator	Glass-Ceramic
Connector, Air	Delrin®
Connector, Vacuum <sup>3</sup>	PEEK
Connector, Vacuum, High Temperatu	ure Macor® Ceramic

#### Vacuum Range 4

UHV, Ultrahigh vacuum	1x10 <sup>-10</sup> Torr
HV, High vacuum	1x10 <sup>-8</sup> Torr

#### Temperature Range 5

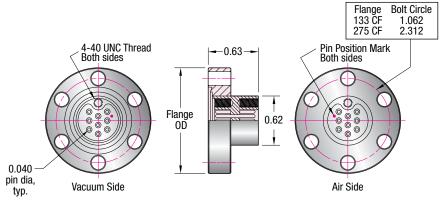

Feedthrough	-200 to 250°C
Flange Mount, Conflat®	-200 to 450°C
Flange Mount, ISO	-26 to 150°C
Connector / Cable, Air	2°08
Connector / Cable, Vacuum	250°C
Connector, Ceramic	400°C
Thermal Gradient	25°C / Minute Maximum

#### Notes

- Electrical ratings are maximum test values, with feedthrough's vacuum side at ≤ 1x10<sup>-4</sup> Torr. Feedthroughs are intended for instrumentation applications carrying low level signal voltage and current.
- 2. For proper heat dissipation, a maximum of 20% of the pins on a feedthrough may carry the maximum pin current at any given time.
- 3. PEEK is a polyether ether ketone thermoplastic.
- 4. Leak tested to 5x10<sup>-10</sup> Standard cc/sec of He.
- Overall assembly ratings must be adjusted to that of its lowest rated component. For cryogenic service, the lowest recommended temperature is -200°C
- Unless designated a 'kit,' connectors and cable assemblies are not included with feedthrough and must be purchased separately.
- § Unless specified otherwise, dimensional units in all sections of this catalog are expressed in inches.

#### **Ultrahigh Vacuum Round Cable Assemblies**

Connector to Cable UHV round cable assemblies are fitted with PEEK Subminiature- $C^{TM}$  female or male connectors at one end and nine, non-terminated, Kapton® insulated wires at the other. The female cable connectors mate directly onto the vacuum-side of nine-pin Subminiature- $C^{TM}$  feedthroughs shown on page 9, or with the male in-vacuum cable connectors. The cable jacket is a PEEK braid with a nominal diameter of 0.14 inches. The nine wires are Kapton® insulated 28 AWG silver plated copper conductors, stranded 7 x 0.005.

Contact to Cable UHV round cable assemblies include male or female contacts on one end and nine, non-terminated, Kapton® insulated cable at the other.

Connector to Connector Extension Cables are fitted with PEEK Subminiature- $C^{TM}$  female connectors on both ends of a 19-inch UHV round cable.

1. They do not include PEEK connectors and will not allow subsequent connector installation. Wires must be threaded through the connector back-piece before crimping contacts

### Subminiature-C<sup>™</sup>, UHV Cable Assemblies

#### **Ultrahigh Vacuum Ribbon Cable Assemblies**

Connector to Cable UHV ribbon cable assemblies are fitted with PEEK Subminiature- $C^{TM}$  female or male connectors at one end and nine, non-terminated, Kapton® insulated ribbon cable at the other. The female cable connectors mate directly onto the vacuum-side of nine-pin Subminiature- $C^{TM}$  feedthroughs shown on page 9, or with the male in-vacuum cable connectors. The ribbon cable jacket is a PEEK weave with a 0.04 x 0.40 inch nominal cross-section. The nine wires are 28 AWG silver plated copper conductors, stranded 7 x 0.005.

Contact to Cable UHV ribbon cable assemblies include male or female contacts on one end and nine, non-terminated, Kapton® insulated ribbon cable at the other.

Connector to Connector Extension cables are fitted with PEEK Subminiature- $C^{TM}$  female connectors on both ends of a 19-inch UHV ribbon cable.

#### **Ultrahigh Vacuum Connectors and Contacts**

PEEK and Macor® ceramic connectors do not include contacts and must be purchased separately. High-use stainless steel Type-T1 contacts are recommended for use in connectors where plug-in cycles will exceed 3 cycles per day.

*Macor*<sup>®</sup> ceramic connectors are designed for high temperature and extreme environments not suitable for our standard PEEK connectors. Note that wires must be threaded through connector back-piece before crimping contacts.

## Subminiature-C<sup>™</sup>, Air-service Cables and Components

#### Air-service Cable Assemblies / Cable

Connector to Cable air-service cable assemblies are fitted with a Delrin® Subminiature- $C^{TM}$  female connector at one end and non-terminated nine wires PVC insulated on the other. The female cable connectors mate directly onto the air side of nine-pin Subminiature-C feedthroughs shown on page 9. The cable jacket is gray PVC with a nominal diameter of 0.23 inches. The nine wires are 24 AWG tinned-copper conductors, stranded 7 x 0.008. Shielding is aluminum / Mylar® foil with a 24 AWG tinned-copper drain wire.
